

IAC Viability Calculator 4. Identifying the factors that influence the health of the Infrastructure Sub Index

Forum: IAC Viability Calculator

Session: 4. Identifying the factors that influence the health of the Infrastructure Sub Index

Participants: 3unpubli

Introduction

The Community Viability Index is a unique tool to support strategic investments which resolve problems common to a group of communities.

This Forum reviews the structure of the Viability Index and most importantly, identifies the indicators that support the seven indices. Once the indicators are finalized then a weighting system will be applied to determine their relative weights.
